EDUCATION

IBM - Department

Dong-A University

2024 - 2025

LANGUAGES

English — Fluent

Korean — Intermediate

Uzbek — Native

SKILLS

Languages: JavaScript, TypeScript, Java, SQL, Bash

Frontend: React, NextJS, Typescript, JavaScript, TailwindCSS, MaterialUI, Shadcn/UI, Redux, Zustand, Context API, Responsive Design, Figma Implementation, Third-party React Libraries, **React Native**, HTML, CSS,

Backend: Java, Spring-boot NodeJS, NestJS, ExpressJS, MongoDB, Mongoose, REST API, GraphQL, JWT, Express-sessions, BetterAuth, 파일 업로드 (Multer, Cloudinary), Socket.io, Prisma, TypeORM

DevOps & Cloud: Docker, Docker Compose, **CI/CD** (GitHub Actions), Linux Server Management, Nginx, PM2, Firewall Configuration, **AWS (EC2,S3)**, Vercel, Render, VPS/VPC

Tools: Git, GitHub, VSCode, Postman, NPM, NVM, Yarn, Figma, File Zilla, Z Shell, **ER** Modalar Tools, **OpenClaw**, Bash

AI and Automation: Claude Code(skills) **Gemini API** Integration, AI-assisted Development Workflows, **n8n** Automation, MCP servers, Claude Agents configuration, Telegram Bots

WORK EXPREICEANCE

Full Stack Developer (remote)

2024 Jan - 2025 Dec

Silk Road Professionals - Fergana, Uzbekistan

Built and maintained the company's core web platform serving consulting clients across 4 countries (Uzbekistan, Korea, Russia, Turkey), handling client onboarding, document management, and project tracking.

- Architected a client management dashboard with React, Next.js, and TypeScript — 15+ pages with role-based views for clients, consultants, and admins
- Designed and implemented 40+ RESTful API endpoints with NestJS + PostgreSQL, including document upload, client progress tracking, and billing modules
- Implemented JWT authentication with refresh token rotation, role-based access control (4 roles), and session management
- Configured zero-downtime deployment pipeline with Docker multi-stage builds, Nginx reverse proxy, and PM2 process management on Linux VPS
- Integrated Cloudinary for document/image processing and implemented Upstash Redis-based rate limiting to prevent API abuse
- Reduced page load time by 40% through Next.js SSR optimization, image lazy loading, and API response caching

Backend Developer (remote)

2022 May - 2023 Nov

ISHONCH Electronics Retails - KoKand, Uzbekistan

Built scalable product catalog and inventory management APIs using Node.js (NestJS & Express) — 30+ endpoints covering CRUD operations, search, filtering, and bulk processing

- Designed optimized MongoDB data models with compound indexes and aggregation pipelines, reducing average query time by 60% for product search
- Implemented secure authentication and role-based authorization system (JWT-based) supporting 3 user tiers (staff, manager, admin)
- Developed automated inventory synchronization across multiple store branches with conflict resolution and audit logging mechanisms
- Deployed backend services on AWS (EC2, S3) with automated backup scripts, logging, and monitoring for high availability
- Created comprehensive RESTful API documentation using Swagger/OpenAPI, enabling seamless frontend integration
